

Equity in Clean Transportation

Anne Brown, PhD

School of Planning, Public Policy, and Management

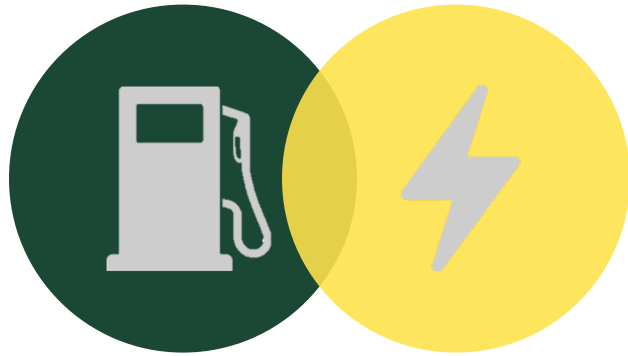

Transportation & Energy

- 28% of energy in the US is used for transportation
- 28% of US greenhouse gas emissions are from transportation

Two paths forward >> Equity-first policies

Change the
energy mix in
transportation

Reduce total
energy consumed
for transportation

Changing the Energy Mix

- Electrify the fleet
 - Vouchers
 - Where are charging stations?
- Environmental justice

Reducing Total Energy Consumption

- Investing in car-alternatives *is* an equity strategy
- Provide alternatives, boost those with fewest options, connect to opportunities
